

Optimising resources and focusing on low carbon will ensure Iskandar Malaysia going towards a more sustainable and dynamic economic region.

The efficient resource-use and low carbon targets shall be achieved through 5 Strategic Thrusts:

- Promote a balanced regional growth
- Protect and enhance natural ecology and green areas to improve bio-diversity.
- Plan and Manage the Built Environment
- Enhance urban Connectivity and Mobility to encourage low carbon living to improve local accessibility
- Adopt Integrated Infrastructure Resources management to promote efficient use and encourage renewables.
